The voice is a powerful tool of communication and self expression. With the voice, we can tell stories, make melodies and build connection. This 2-part HYBRID voice workshop will take you on a journey of building and expanding vocal confidence, to using your voice in community building and music making through vocal play.

PART I, 21.11.2020, ONLINE: Sing With Confidence

The ONLINE session will focus on building and expanding confidence in using your own voice. Through guided exercises in fundamental vocal techniques and body-voice activities, you will learn how to release unnecessary tensions and gain access to a more powerful and resonant voice.

You'll learn exercises and warmups for the breath, voice and body, and learn to access the vocal modes in which all sounds are produced. Knowledge about how the voice works is varied with "learning by doing". You can ask any questions you may have during the workshop immediately in the chat, or live in person during the open Q&A!

www.musiktherapie.lu

You'll leave the workshop with a new toolbox of techniques that you can directly implement to release tension and strain, gain more freedom, and be able to use your voice with more power, presence and confidence.

A replay is available for registered participants (2 weeks after the online workshop). However, in order to get most out of the training, it's highly recommended to participate in the live online workshop.

Katja has many years of experience of facilitating online workshops for groups, and knows how to create a safe and engaging learning environment that will even make you forget you're online!

"Within the first 15 minutes of my first online class, I completely forgot I was in an online lesson, and felt like I was sitting in the same room, at the same table with Katja. She is so helpful and kind, respectful of all participants questions, and very clear in her explanations. It didn't even matter that English isn't my first language, I had no problem whatsoever understanding her."

Nicolas Tabarracci, Argentina
